Dunatank's Warrior CC - Documentation

I.   Introduction

Thank you for choosing **Dunatank's Warrior CC**! DWCC is a Warrior Combat

Routine with many awesome features, such as:

- support for all botbases
- PvE and PvP rotations
- Advanced movement
- automatically move out of AoE Spells (MoP Raidbosses only)
- Resting
- Configurable Cooldowns
- special rotations for all low-level brackets
- unbeatable DPS/TPS
- Auto-Target based by threat
- Usage of Potions/Healthstones
- Advanced PvP Logic (auto-swapping between One-handers and Two-handers for survival)
- Usage of Life Spirit
- Racial ability support
- Synapse Springs support
- Trinket support
- Graphically advanced UI

This documentation will take you through the installation process and the configuration of DWCC. Please note that you will need **TortoiseSVN** to download DWCC as well as receive updates.
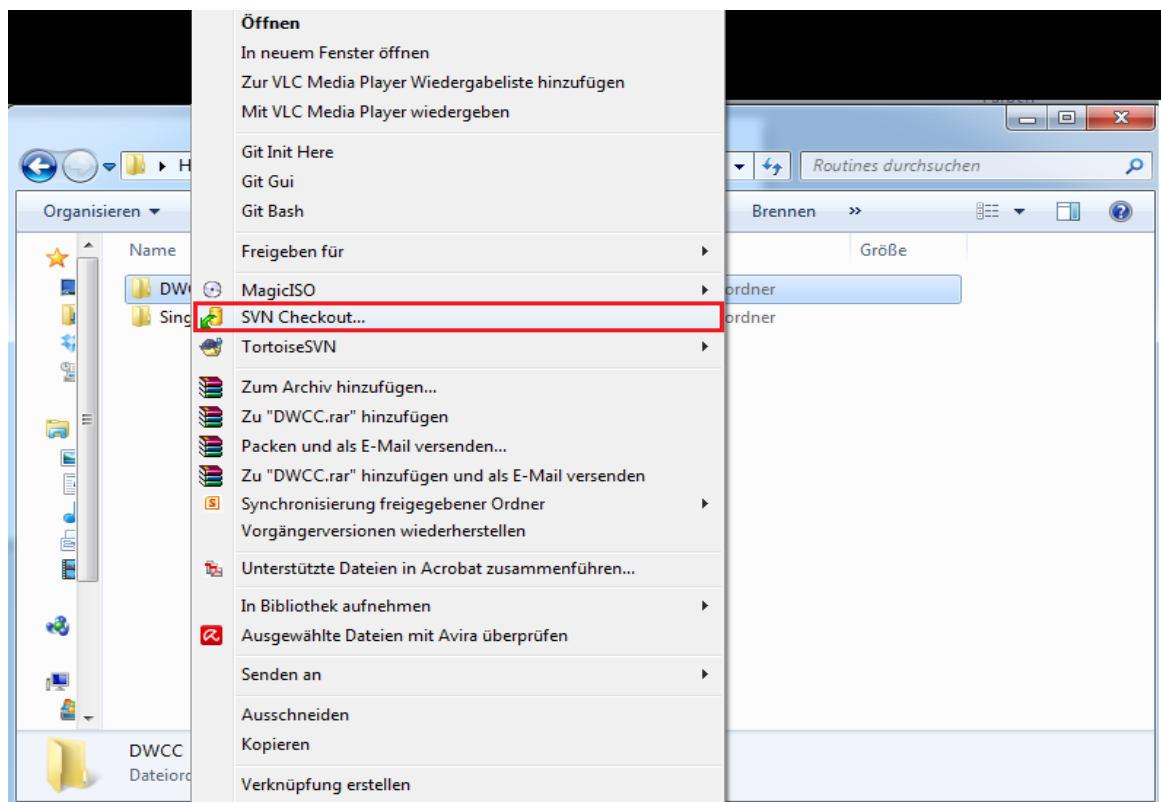

Enjoy using Dunatank's Warrior CC!
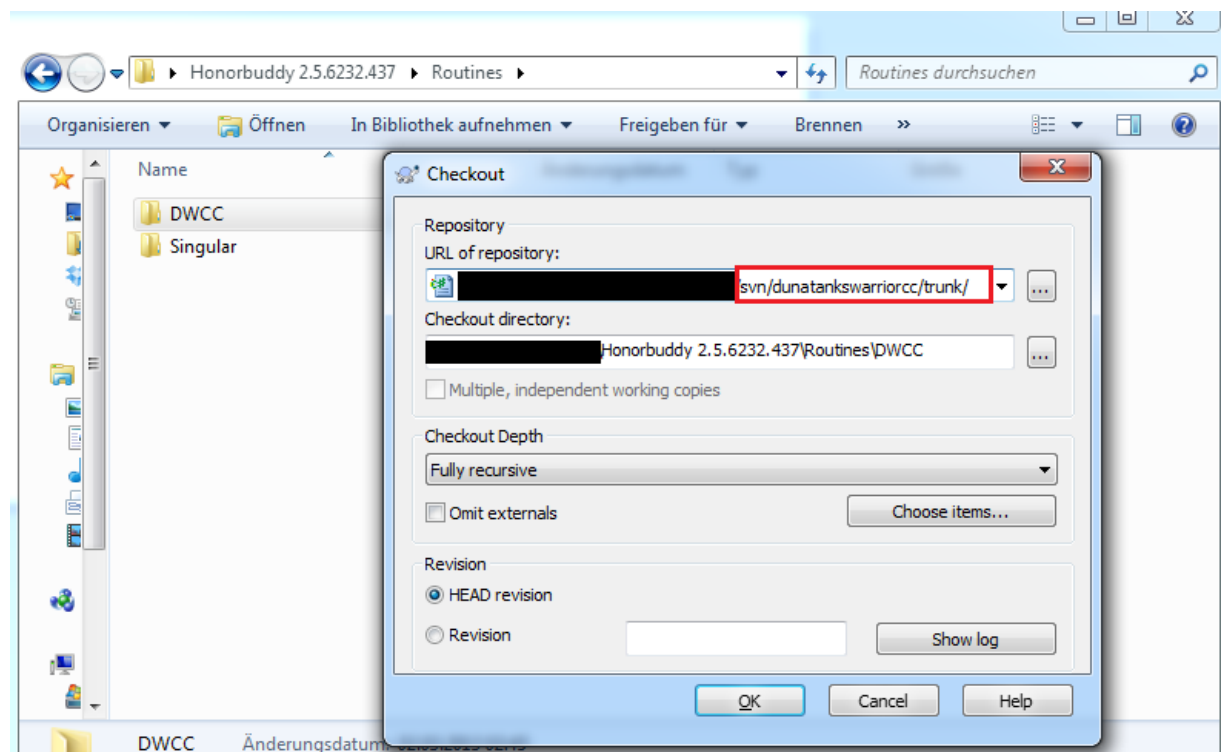

II.   Installation

After having recieved your personal SVN credentials, go to your Honorbuddy folder. In that folder, there is a subfolder called "Routines". Open that folder and create a new folder there. The folder name has to be "**DWCC**".

Right click that folder and select "**SVN checkout**" from the dropdown menu.

Paste the SVN link you received together with your SVN login credentials into the "**URL of repository**" field of TortoiseSVN.
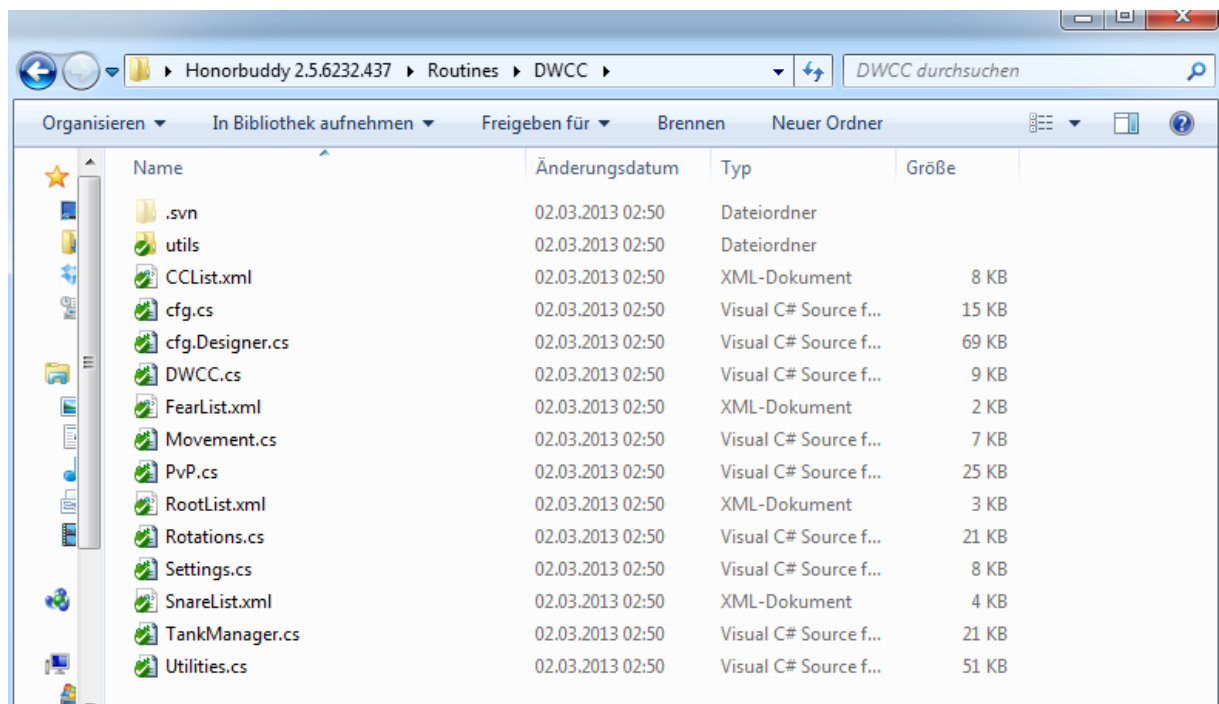

After you hit "OK" you will be asked for your login credentials. Enter them and continue the process. DWCC will now be downloaded directly into your Routines folder.

If everything went correctly, you will see a success message.

After successfully downloading DWCC, you can close this window. Your folder should now look like this.

Note: Make sure DWCC is located in Honorbuddy\Routines\DWCC\ and ~~not~~

~~**Honorbuddy\Routines\DWCC\dunatankswarriorcc\!**~~

III.　　Configuration

1) Select the specc you want to use Dunatank's Warrior CC with.

2) Those are the tabs for the specc specific settings.

3) This setting disables CC movement. Some other features are tied to this. In case movement is disabled, the following features are also disabled (no matter if specifically enabled):

   a. Pull

   b. Dismount

   c. Move out of AoE effects

4) The combat distance determines which mobs are regarded as "in AoE range"/"adds". The combat distance should be around 7-11. 8 is the normal melee range, but as most AoE spells have a bigger range, you can also set it to a higher value. The given figure is in yards.

5) This setting enables the use of racial abilities. The conditions when to use those abilities are already preset.

6) This checkbox enables the automatic movement out of AoE effects in MoP raids. This feature only works for bosses. DWCC will attempt to move your warrior to the closest healer who is not affected by the debuff. This feature is tied to movement and will automatically be disabled when movement is disabled.

7) This checkbox enables the dedicated PvP rotation. Please note that this rotation replaces the PvE rotation as long as it is enabled. You might experience a massive DPS drop in PvE context with the PvP rotation enabled.

8) These two boxes allow you to configure the usage of your trinkets. **If your trinkets does not have a "use" effect, be sure to have this set to "do not use" or it could prevent DWCC from performing properly!**
   The settings are:

   a. Use on CD (Trinket is used in combat whenever it is ready)

   b. Use below 20% (Trinket is used when your target has less than 20% HP to give an extra boost during execute phase)

   c. Use when crowdcontrolled (Trinket is used when you are crowd controlled, usually used for PvP trinkets)

   d. Use on Heroism (Trinket is used whenever a buff similar to Heroism/Bloodlust is active)

   e. Do not use (Trinket is not used. Choose this setting when your trinket is not usable or if you want to use it manually.)

9) This setting sets when to use Synapse Springs (Engineering glove enchant).
   Set it to "do not use" when you don't have the enchant on your gloves.

10) This button will save your settings & close the settings menu.

IV.   Updates

You will recieve your updates directly via our SVN. Updates are announced in our thread at the BuddyForum. You will also see the changelog there.

V.   Feedback

Your feedback is always welcome. You can give feedback or report issues directly in the BuddyForum: http://www.thebuddyforum.com/honorbuddy-forum/combat-routines/warrior/68956-dunatanks-warrior-cc-arms-fury-protection-cc.html
